

TurtleSkin Metal Flex Armor Multi Threat Performance

Advanced puncture and stab protection
in a unique component system
of hard and soft elements.

MFA Flexible Layer
System.

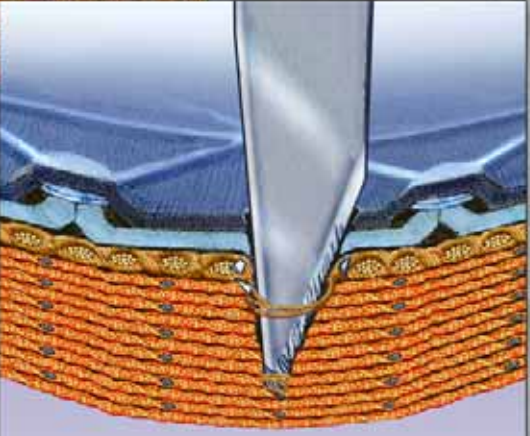

Metal element damages blade
& reduces cutting efficiency.

- Hardened metal element damages and breaks sharp penetrators upon contact - reducing cutting effectiveness.
- Dulled edge of penetrator tangles in TurtleSkin fabric layer creating drag and absorbing energy.
- MFA panel flexes with impact to further absorb energy and reduce penetration.
- Energy is absorbed - penetrator is defeated.

TurtleSkin MFA is a complete body armor solution.
MFA performance can be custom configured to user
specs to meet a variety of threat levels.

TurtleSkin layer
tangles & contains
cutting edge.

MFA flexes to absorb energy.
Knife is defeated.
