Safety Gloves

TurtleSkin SafeHandler

Durable Aramid Knit Gloves with the Added Protection of TurtleSkin

TurtleSkin SafeHandler

Rugged multi-purpose gloves, the TurtleSkin SafeHandler offers advanced TurtleSkin cut and puncture protection combined with excellent grip, durability, and dexterity. A layer of patented TurtleSkin adds increased protection to the palm and fingertips. Gripper dots cover both sides of the glove, which is reversible if puncture protection is required on the back of the hand.

SafeHandler Plus -
APD-2D1

100% TurtleSkin aramid layer inside for highest level of puncture and cut protection.

Size: Large

Machine Wash - Do Not Bleach

**No gloves are cut or puncture proof. TurtleSkin gloves offer cut and puncture resistance to specific areas shown above.*

Chosen by NASA

TurtleSkin fabric has been to Mars and was also chosen by NASA for use on the space shuttle. Our patented weave is the tightest ever achieved with rugged, cut resistant aramid fiber - effectively preventing fine penetrators from passing through the TurtleSkin fabric.
